ILLUSTRATIVE IMAGE

A sourcing partner, not a factory. Here is what that means for your order.

WeaveSources works on the buyer's side. We match your product to suitable independent manufacturers in Pakistan, write the specification with you, coordinate a sample for your approval, follow production against it, and plan packing and export. You are told which manufacturer makes your order.

THE BUYER

You

— Set the requirement
— Approve the sample
— Own the specification

SOURCING PARTNER

WeaveSources

— Write and maintain the specification
— Select and coordinate the manufacturer
— Coordinate quality checks and export
— Be your single point of contact

INDEPENDENT MILL IN PAKISTAN

Manufacturing partner

— Produce samples and orders
— Hold their own certifications
— Perform in-line production checks

FORWARDER / CARRIER

Logistics partner

— Move goods from port to destination
— Customs handling as agreed

HOW TO READ THE SPECIFICATIONS IN THIS CATALOG

Commonly specified

Industry reference values to help you write a brief. They are not a WeaveSources offer or a guaranteed capability.

Confirmed at quotation

Set for your order with the manufacturing partner and confirmed to you in writing, before any sample is made.

Cotton Bath Towels

Everyday cotton terry bath towels for retail and wholesale.

A cotton terry bath towel specified for the shelf as much as the bathroom: consistent colour across lots, a border that photographs well, and packaging that suits your channel.

The core of most towel programmes. Bath, hand and face formats are best specified together so weight, border and colour match across the set.

BEST FOR

Bath Sheets

Larger format for premium rooms, spas and retail.

A bath sheet signals a step up in room category. It also changes your laundry load and storage space, so size and weight should be decided together.

BEST FOR

Suites, premium rooms, spa changing areas, retail

Hand Towels

High-turnover, everywhere.

Hand towels are replaced most often and washed most often. Matching them to your bath towels — weight, border, colour — is what makes a set look intentional.

BEST FOR

Guest bathrooms, washrooms, salons, retail sets

TYPICALLY BOUGHT BY

Hotels · Salons · Vacation rentals · Distributors

MATERIAL	100% cotton terry, matched to the set	COMMONLY SPECIFIED

Washcloths & Face Towels

Small format, high volume.

Small, washed constantly, and easy to get wrong on consistency. Washcloths are a good place to test a supplier: dimensions and hemming show quality quickly.

BEST FOR

Guest bathrooms, spa treatments, amenity kits, retail sets

Coordinated Towel Sets

Bath, hand and face towels specified as one set.

A set sold or presented together has to match: same colour lot, same border, proportionate weights. Specifying the set as one product keeps every piece consistent.

BEST FOR

Retail sets, gift programmes, vacation rentals

TYPICALLY BOUGHT BY

Retail brands · E-commerce brands · Private-label brands · Vacation-rental operators

Hotel Bath Towels

The guest-room standard.

The towel guests judge a room by. For hotels the brief is a balance: a hand-feel that matches the room rate, and a weight your laundry can turn around without extending drying cycles.

Hospitality towels are judged in the room and in the laundry. Weight, construction and finish are specified to balance guest feel against drying time and wash life.

BEST FOR

Guest rooms, suites, serviced apartments

Hotel Towel Programmes

Bath, hand, face towels and bath mats for a whole room.

A full room set — bath towel, hand towel, washcloth and bath mat — specified once so every piece matches, and so replacement stock matches the original order.

BEST FOR

Hotel groups, linen suppliers, refurbishments

TYPICALLY BOUGHT BY

Hotel supply companies · Commercial linen suppliers · Hotel groups

MATERIAL	100% cotton terry	COMMONLY SPECIFIED

Spa Towels

Treatment rooms and wellness.

Spa towels are often coloured, washed hot, and handled by guests in a calm setting where texture is noticed. Colourfastness and hand-feel should be agreed on the sample.

Towels used and washed many times a day. Colourfastness, drying speed and durability usually matter more here than maximum plushness.

Your brand, built into the specification — not added at the end.

Logo
Embroidered, woven border or jacquard, depending on the product and volume.

Colour
Dyed to your Pantone or physical swatch; yarn-dyed stripes for beach and kitchen.

Construction
Border style, pile, size, hem and the composition of a set.

Labels
Brand, care, size and fibre-content labels; swing tags and barcodes to your artwork.

Packaging
Bulk carton, bundled and banded, poly-bagged, retail-ready or gift-boxed.

Product development
Start from a towel you already sell, a competitor's sample, or a written brief.

Every option is offered only where the manufacturing partner for your order supports it, and is confirmed on your sample before production.

THREE WAYS TO START A PRIVATE-LABEL PRODUCT

01
Match a towel you sell now
Send it to us. We record its weight, size, construction and finish as the starting specification.

02
Improve on a reference
Send a competitor's product or a photo, and tell us what to change: weight, feel, colour, price point.

03
Start from a brief
Use the specification builder at weavesources.com/specification, or answer our questions by email.

Shelf-ready details, agreed before the sample.

PACKAGING FORMATS

- Bulk export carton, with carton marks to your specification
- Bundled and banded (e.g. 10 or 12 pieces)
- Individually poly-bagged, with barcode stickers
- Retail-ready: belly bands, header cards or printed sleeves
- Coordinated sets, banded or boxed
- Gift box
- Rolled and banded (beach towels)

U.S. LABELLING POINTS WE COVER WITH YOU

- Fibre content, country of origin and the dealer's identity (name or RN number) — Textile Fiber Products Identification Act
- Care instructions — FTC Care Labeling Rule
- Barcodes, swing tags and carton marks to your retailer's requirements

General guidance to help plan your labels. Responsibility for your product's compliance stays with the importer of record.

WHAT TO SEND FOR ARTWORK

- — Logo as a vector file (AI, EPS, SVG or PDF)
- — Colour references: Pantone codes or a physical swatch
- — Label wording, size and position
- — Packaging dieline or format, and quantity per pack
- — Barcodes / UPCs, if retail-ready

Hold the towel before you commit to an order.

Every new product starts with a physical sample made to your written specification. Wash it, weigh it, measure it and use it. Ask for changes, or stop there.

01 **Request.** Send the reference, or your brief, and a delivery address.

02 **Confirm.** We confirm sample cost, timing and courier in writing before anything is made.

03 **Evaluate.** Test it your way. We record your feedback in the specification.

04 **Approve.** The approved sample becomes the production reference and is kept on file.

YOUR QUOTATION IS BASED ON

Fibre and yarn, weight, size, construction, colour, branding, packaging, quantity per size and colour, and destination. We quote only once a suitable manufacturing partner has confirmed the specification.

IT STATES, IN WRITING

— Price per piece for the specified quantity
— Minimum order for that specification
— Sample cost and timing
— Production timing from approval
— Incoterms and payment terms

Checked against your approved sample — not a general standard.

WHAT IS CHECKED BEFORE SHIPMENT

GSM	Weight per square metre, against target and tolerance
Dimensions	Finished length and width, against tolerance
Colour	Compared to the approved sample under consistent light
Construction	Pile, border and hem match the reference
Stitching	Hems and borders secure, no loose threads
Branding	Logo or label position, size and finish
Packing	Packed, labelled and marked as specified
Quantity	Counts per size and colour match the order

Before production

The check plan — what is checked, when and by whom — is agreed in writing with you.

During production

The manufacturing partner performs in-line checks; we follow up and record results.

Before shipment

A check against your specification and sample. Third-party inspection when you arrange or request one.

CERTIFICATIONS

Certificates are held by manufacturing partners for specific facilities and scopes — not by WeaveSources. None are published in this edition. Tell us the standard you need and we will only propose partners who can evidence it, with the certificate for you to verify with the issuer.

From first message to shipment, each step visible to you.

01 **You share your requirements**
Product, use, quantity, branding, packaging and destination — rough answers are fine.

02 **We identify suitable manufacturing options**
We match your brief to independent Pakistani manufacturers that regularly make that product.

03 **Specification and quotation are agreed**
A written specification with tolerances, and a quotation confirmed with the partner.

04 **Samples are prepared and reviewed**
A physical sample made to the specification. You wash it, use it and request changes.

05 **Production starts after your approval**
The approved sample becomes the production reference. Nothing starts without it.

06 **Quality checks follow the agreed plan**
In-line checks by the partner; a pre-shipment check against your specification and sample.

07 **Packing and shipment are coordinated**
Packed and marked as specified, then handed to the forwarder on the agreed Incoterms.

08 **You receive documents and updates**
Check results, commercial invoice, packing list and transport documents — and a named contact throughout.

YOUR INQUIRY — THE DETAILS THAT GET YOU AN ACCURATE QUOTE

Product	Catalog reference (e.g. WS-HT-01) or description
Size & weight	Target dimensions and GSM, or a towel to match
Branding	Logo method, labels, private label
Quantity	Per size and colour, or annual volume
Documents	Any test standard or compliance document you need
Use	Hotel, retail, spa, gym, kitchen, promotional…
Colour	Pantone, swatch or ‘white’
Packaging	Bulk, bundled, poly-bagged or retail
Destination	Country, port or warehouse

Rough answers are fine. Missing details are what the specification stage is for.

WHAT YOU RECEIVE IN WRITING

- Written specification with tolerances
- Quotation confirmed with the manufacturing partner
- The name of the partner making your order
- Sample approval record
- Pre-shipment check results
- Commercial invoice, packing list and transport documents
